SUMMARY

Computer Science Engineering graduate seeking an entry-level Software Developer role, with foundational knowledge of Python, C, Java, SQL, and web technologies. Interested in developing practical software solutions, solving technical problems, and contributing to a collaborative team while continuously learning and improving technical skills.

SKILLS

Programming Languages: C, Python, Java (Basic), JavaScript (Basic).
Frontend: HTML, CSS, React.js, Tailwind CSS, Bootstrap.
Backend: Flask, Django, Node.js (Basic).
Databases: MySQL, SQLite.
Tools: Git, GitHub, Visual Studio Code (VS Code), MS Excel, MS PowerPoint.
Core Concepts: Object-Oriented Programming (OOP), Operating Systems, Computer Networks, Database Management Systems (DBMS), Data Structures and Algorithms (Basics).
Soft Skills: Communication, problem-solving, teamwork, adaptability, time management, and willingness to learn.

PROJECT

AI-Based Cyberbullying Prevention System

- Developed a secure social media platform using React.js, Flask, and MySQL, enabling users to create posts, communicate in real time, and interact securely.
- Designed and trained a CNN-BiLSTM with Attention model for real-time cyberbullying detection and text classification.
- Applied NLP preprocessing techniques including text cleaning, tokenization, padding, and word embeddings.
- Integrated the trained model into the messaging platform to automatically detect, flag, and moderate harmful messages, enhancing user safety.

Task Management (To-Do List) Application

- Developed a full-stack Task Management application using React.js, Flask, and SQLite.
- Built REST APIs to add, retrieve, and delete tasks.
- Integrated the frontend with the Flask backend and SQLite for seamless task management.

EXPERIENCE

Intern-OrbitSol **June 2026 – July 2026**

- Collected, organized, and maintained business data using Microsoft Excel.
- Developed a Node.js-based web scraping solution to extract company contact information, including names, email addresses, phone numbers, and job roles from business websites.
- Adapted quickly to professional workflows and industry best practices.

Python Full Stack Intern – SMEC Technologies **August 2026 – Present**

- Developing skills in Python programming, web development, and database management through hands-on training.
- Practicing full-stack development concepts and applying them through practical coding exercises and projects.

PUBLICATION

A Personalized Chess AI Framework with Minimal Training and Dynamic Player Adaptation (IEEE Conference Publication | IEEE Xplore)

EDUCATION

SCMS School of Engineering and Technology Karukutty, Ernakulam
B.Tech Computer Science and Engineering June 2026
CGPA: **8.62**

ST. ANN'S Higher Secondary School Eloor, Ernakulam
Class XII – **95.25%** May 2022

AWARDS AND ACTIVITIES

- Achieved Second Position in Semester 7 with an SGPA of **9.87**.
- Participated in TINK-HER-HACK 3.0 at SCMS School of Engineering and Technology.
